

BAG IT.
DON'T DRAG IT.

StrapPak[™]
by KINEDYNE

Introducing the StrapPak[™] by Kinedyne. A quick, easy and inexpensive way to secure the loose end of your ratchet straps.

With StrapPak[™], you'll never have to resort to duct tape or cable ties to prevent the loose end of your straps from draggin behind your trailer.

- StrapPak[™] attaches to any standard 2" ratchet strap with a minimum 12" fixed end length and will safely secure excess web on straps up to 30 feet in length.
- You can use StrapPak[™] on any open-air or enclosed trailer or utility truck.

Problem

Solution

StrapPak[™]
by KINEDYNE

StrapPak[™] will help you save time and money when securing a load.

StrapPak[™] can be ordered preassembled on any standard or custom stenciled strap assembly in several different end hardware configs.

StrapPak[™] will make it easy to store and transport your ratchet straps when they are not in use.

A retail oriented bilingual packaging design makes it easy for anyone to see the benefits of using StrapPak[™] on their ratchet straps.

So bag it, don't drag it with StrapPak[™]. It's more than safe. It's smart.
